

# HD Chem Goes Beyond Clean

## Delivering Spotless Dishes, Glassware, and Flatware to Top Restaurants

**June 16, 2014** – When a meal is served, a tremendous amount of time and care has gone into making sure that the food is perfect and exactly as the chef has envisioned. The dining experience needs to be just as perfect as the food itself. With HD Chem, be confident that your creations are always served on flawless dishes, poured into sparkling glasses, and eaten using spotless flatware.

HD Chem provides a complete package of cleaning solutions for your kitchen, dining room, and restrooms. Our dish detergents, presoaks, enzyme stain removers, and rinse aids remove soils that commonly plague restaurants, from dried-on foods, to lipstick stains, to hard water spots. HD Chem cleansers developed in conjunction with Eversoft, the water experts, produce amazing results that deliver the best experience to each and every one of your customers.

With Eversoft's 40 years of experience servicing Southern California businesses, we know what your water needs better than anyone. HD Chem's line of dish washing machines is configured to get the best results out of your water. Our dispensers and dish machines are designed to make the most efficient use of each product by dispensing measured amounts of cleaning solutions that maximize their cleaning power while limiting waste, and as a result, cost. We make installation easy with negligible impact on your daily operations. We train your staff on proper machine usage. And our expert technicians ensure your machines are always in top operating condition to produce the very best results with a minimal amount of HD Chem chemicals to save you both time and money. Trust HD Chem dishwashing machines to keep your dishes beyond clean.

Contact HD Chem today to find out how we can help your restaurant ensure its dining experience is always at its best.
